Reference: Eastern Shore Drive Interim Backflow Prevention Feasibility Analysis

Dear Property Owner:

This letter is to inform you the City has undertaken the above referenced project. In response to citizen requests Public Works/Engineering will evaluate all potential temporary backflow prevention measures along the Cape Henry ditch within the Cape Henry and Lynnhaven Colony neighborhoods and along Long Creek in Lynnhaven Colony. The results of the evaluation will be available to the public in May 2013.

Starting February 4, 2013 and ending May 31, 2013, representatives of Kimley-Horn & Associates and NXL will be surveying the area bounded by Shore Drive, Long Creek and First Landing State Park. The survey work will include access to private property to the extent allowed by Section 33.1-94 of the Code of Virginia to obtain the finished floor and garage floor elevations of all dwellings at or below Elevation 6.0 (NAVD88).

We are committed to conducting this field work in the least disruptive way as possible. If you have any questions or concerns about the actions of the field personnel or other project issues, please contact me directly at 385-1978 or Mr. Michael Mundy at 385-4131.

We appreciate your cooperation and look forward to the successful completion of this project.

Sincerely,

Michael S. Bumbaco

Michael S. Bumbaco
